HxWxD: 67.56" x 24.41" x 40.39"

Weight: 1047 lbs

Closed Loop System

ScrapRight's cash dispensers operate securely in a closed loop system. Dispensers present cash only when an encrypted barcode is scanned at the machine, or when a secure passcode is entered. Cash dispensers may be configured to dispense to a teller or to dispense through customer interaction with the machines. An internal local network connection between ScrapRight's server and the dispenser comprises the closed loop system and does not interact outside of this network.
